Funding Innovation for Healthy Aging

The National Institute on Aging (NIA) leads a broad scientific effort to understand the nature of aging and to extend the healthy, active years of life.

NIA provides more than $100 million in set-aside funding for the Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs.

The Institute offers non-dilutive grants to commercialize interventions that address aging, aging-related diseases, and the special needs of older Americans.

NIA is the primary federal agency leading research on Alzheimer’s disease (AD) and AD-related dementias (ADRD).

What Is Your BIG IDEA

We’re looking for groundbreaking ideas in aging research and AD/ADRD:

- **INNOVATION** to support healthy aging and aging in place
- **INTERVENTIONS** to help people with aging-related diseases
- **SOLUTIONS** for aging-related challenges and needs
- **TOOLS** to efficiently assess and diagnose aging-related diseases
- **TECHNOLOGY** to reduce burden and improve care and services

APPLICATION GUIDANCE

Is your project idea a good fit for NIA? Contact Dr. Michael-David A.R.R. Kerns: kernsmd@mail.nih.gov.

ONLINE RESOURCES

GENERAL QUESTIONS

Contact the NIA Office of Small Business Research: 301-827-2522 or niasmallbusiness@mail.nih.gov.
Available Opportunities

OMNIBUS FUNDING
Investigator-initiated
Standard application due dates:
› Jan. 5, Apr. 5, Sept. 5 ‹

NIA-FOCUSED FUNDING
Focused priority areas in aging
Includes higher AD/ADRD budgets
Application due dates vary

NIA Divisions Support Research on:

- Aging Biology
- Behavioral and Social Research
- Geriatrics and Clinical Gerontology
- Neuroscience, including AD/ADRD

NIA SBIR & STTR Seeks

- Innovative solutions to significant unmet clinical needs
- Solutions that have significant commercial potential
- Projects that:
  • Leverage the expertise of the company/founder
  • Seek funding to produce feasibility data (Phase I) or conduct product-focused development activities (Phase II)

Special Research Interests in AD/ADRD

NIA’s SBIR & STTR programs have funding available up to $500,000 for Phase I and $2.5 million for Phase II in AD/ADRD topics.

NIA seeks AD/ADRD research focusing on:

- Prevention
- Diagnosis
- Treatment
- Care & Caregiving
- Research & Clinical Tools
- Analytical Tools
- Digital Health
- Novel Devices

Focus on Alzheimer’s Disease and Related Dementias Research

AD is the sixth leading cause of death in the U.S., affecting more than 5 million Americans. Continued, significant investments are needed if we are to meet the national goal of preventing and effectively treating AD.

NIA’s SBIR and STTR programs provide AD and ADRD research funding where it is most needed: in the early stages of R&D when new ideas are tested. We expect to provide over $100 million in funding for small business innovation in aging, AD, and ADRD.
## Understanding the NIA SBIR & STTR Programs

### Who Is Eligible?
Organized for-profit U.S. small businesses with 500 or fewer employees. Learn more at [nia.nih.gov/sbir](http://nia.nih.gov/sbir).

### How Do SBIR & STTR Differ?

<table>
<thead>
<tr>
<th>SBIR</th>
<th>STTR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supports small businesses conducting early-stage R&amp;D to commercialize innovations in healthy aging and diseases of aging.</td>
<td>Supports small businesses that are formally collaborating with a research institution (e.g., university) in R&amp;D to commercialize innovations.</td>
</tr>
<tr>
<td>PERMITS research institution partnerships</td>
<td>REQUIRES research institution partnerships</td>
</tr>
<tr>
<td>The small business may subcontract ~33% of Phase I activities and 50% of Phase II activities.</td>
<td>The for-profit small business should conduct a minimum of 40% of the work, and a non-profit U.S. research institution should conduct a minimum of 30% of the work.</td>
</tr>
<tr>
<td>The Project Director / Principal Investigator’s primary employment (&gt;50%) must be with the small business for the duration of the project period.</td>
<td>An agreement providing necessary intellectual property (IP) rights to the small business is required to carry out follow-on R&amp;D and commercialization.</td>
</tr>
</tbody>
</table>

Awards are always made to the small business. Contact us for help determining whether SBIR or STTR is the best match for your project.

### SBIR & STTR Program Phases and Funding Levels

<table>
<thead>
<tr>
<th>Phase I</th>
<th>Phase II</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Discovery &amp; Feasibility</strong></td>
<td><strong>Development &amp; Full R&amp;D</strong></td>
</tr>
<tr>
<td>• Up to 1 year</td>
<td>• 2 years</td>
</tr>
<tr>
<td>• Awards up to $300,000, or up to $500,000 for AD/ADRD</td>
<td>• Awards up to $2 million, or up to $2.5 million for AD/ADRD</td>
</tr>
<tr>
<td>• Establish technical merit, feasibility, and potential for commercialization</td>
<td>• Continues Phase I R&amp;D efforts</td>
</tr>
<tr>
<td>• Requires a commercialization plan</td>
<td></td>
</tr>
</tbody>
</table>

**Fast Track** • One combined application for Phases I and II

**Direct-to-Phase II** (SBIR only) • Apply directly for Phase II funding • Demonstrated feasibility through other funding sources

**Commercialization Readiness Pilot** • Funding for late-stage R&D and technical assistance for commercialization

**Phase IIB** • Competing Renewal • 3 years • Awards up to $3 million
**Tips for Applying**

**Start Early.**
Strong proposals take time to develop.

**Complete Required Registrations.**
You will need to register your company with five systems before applying.

Sign up for DUN and Bradstreet Universal Numbering System (DUNS), System for Award Management (Sam.gov), SBA Company Registry, eRA Commons, and Grants.gov.

---

**Connect with NIA Before Submitting Your Application.**

- What is the therapeutic or technology you are developing?
- How is your idea innovative, what unmet need is being addressed, and what technical challenges must be overcome?
- What is the value proposition and the existing competition for the therapeutic or technology?
- How is the product relevant to NIA’s R&D mission?
- What are your specific research aims, including key models, assays, metrics, and quantitative performance milestones?

---

**Additional Resources**

**First-Time and Never-Funded Applicants**

**Applicant Assistance Program.** A 10-week coaching program to help develop your application. Offered once each standard funding period.

**All Awardees**

**Technical Assistance Budget Allowance.** Supports services such as access to technologies, IP protections, and market research. Offers up to $6,500 for Phase I and up to $50,000 for Phase II when requested in the grant application.

**Diversity Supplement.** Helps increase the diversity of the research workforce by supporting students, postdocs, and eligible investigators from underrepresented groups.

**C3i Program for NIH.** Supports medical device innovators in commercializing their products through a 24-week entrepreneurial training course.

**SEED Resources.** Support from the NIH Small Business Entrepreneurial Education and Development (SEED) Office including access to Entrepreneurs in Residence and regulatory support.

**Phase I Awardees**

**I-Corps™ at NIH.** An 8-week intensive course that offers real-world, hands-on entrepreneurship training and customer discovery in life sciences and biotechnology.
