

Are you worried about memory loss in your future?

Subtle memory concerns are associated with an increased likelihood of Alzheimer's disease changes in the brain. If you are between the ages of 65 and 85 and are interested in learning more about a clinical trial aimed at preventing the memory loss due to Alzheimer's disease, please visit A4Study.org or call 844-A4STUDY (844-247-8839)
